

Nimbus Mobile

Nimbus Mobile is a fire alarm service engineer's test logger. Nimbus Mobile communicates and records fire alarm commissioning and service activity to Nimbus.

Paperless records

- Central log of service activity by device, engineer, date
- Reduced administration duties/costs

Independent evidential audit trail

- Streamline external auditing

Performance data

- Monitor and analyse site and engineer performance

Plan and schedule

- Define how many service visits are required per annum and which devices are to be tested in each visit

Use with Nimbus Engineer

- A single engineer testing
- Improve engineer performance
- Reduce engineer costs
- Reduce administration costs
- Receive confirmation as tests are performed
- Schedule which devices in which service period to test
- Record and log – Pass/Fail with Comments, Photographs & Bar Codes
- Optimise rectification and upgrade work

Nimbus Mobile is supplied in a portable carry case which includes a USB battery, auxiliary power cables, and USB power plug
